Identification of Parts

JUL 28 1965

Allegheny Ballistic Laboratory  
Near Pinto  
Cumberland, Maryland

1. The Foreign Technology Division at Wright-Patterson AFB has received, what is believed to be a motor mechanism of a Scout Rocket manufactured by your company. The objects were recovered by the Royal Thai Air Force and were turned over to the Joint Military Advisory Group in Thailand for identification.

2. The Foreign Technology Division would appreciate your assistance in identifying the individual parts and determining whether they belonged to the Army or Navy inventory.

MEMO FOR THE RECORD: Phone Conversation of 5 Aug 65

Jim SchROUT, area code 304, phone 738-9000, extension 8383

Allegheny Ballistics,. In placing phone call inform operator not to change the area code to 301 as listed in her book but to use area code 304.

Reference the rocket parts that were found in Thailand, would like to know where it was found and when it came down. Object supposedly fell sometime in May. This part is all that we know that fell. Object was launched from Wallops Island, 16 Dec 64, Scout Mission, San Marco Vehicle, and was a joint effort with the Italians on an air density program. Payload was expected to orbit for six months. Rocket would have had to complete at least six orbits before it could have fallen in Thailand. Now they are wondering if the Payload was near this object when it came down, as it was supposed to come down separately (the rocket body that is) at an earlier date and had been expected to burn up. They are photographing the object, will probably turn the object over to NASA. He will send us a complete report on the object.

8 Jul 65

Thailand package came in as  
VFO, at 1015.

At 1030 phoned Mr. Haines, he  
looked at obj and said it  
looked good.

At 1040 called Mr. Van Damm.

Obj turned out to have standard  
Army & Navy shields. Possible  
portion of US rocket

Attention: TDEW -- Colonel Eric T de Jonckheere

Dear Sir:

### Components from 4th Stage Scout Recovered in Thailand

Reference your letter of 28 July 1965, Hercules Powder Company is pleased to advise that the components returned to us therewith were part of a rocket motor manufactured at the Allegany Ballistics Laboratory for the National Aeronautics and Space Administration, Langley Research Center, on Contract NAS 1-3698. Pertinent data on this rocket motor are as follows:

- (1) Motor Description -- Jato 24DS-5850 X258
- (2) Motor Manufacturer -- Hercules Powder Company, Allegany Ballistics Laboratory
- (3) Date of Manufacture -- 13 November 1964
- (4) Motor S/N -- RH-75
- (5) Mission -- 4th stage propulsion on Scout Vehicle S-137, San Marco Mission
- (6) Payload -- Air density
- (7) Orbit -- Perigee 115 miles; Apogee 350 miles
- (8) Payload Life -- Expected six months
- (9) Launch Date -- 16 December 1964
- (10) Launch Station -- Wallops Island, Virginia
- (11) Date of Re-entry of 4th Stage Parts -- Approximately May 1964
- (12) Place of Re-entry of Motor Parts -- Sisakit Province, Thailand

The subject components are presently being retained at Allegany Ballistics Laboratory.

Colonel Eric T de Jonckheere - 2  
Wright-Patterson Air Force Base, Ohio  
Components from 4th Stage Scout Recovered in Thailand

If additional information on these components becomes available from the Joint Military Advisory Group in Thailand, we would appreciate receiving same.

If we can be of further assistance, feel free to call upon us.

Very truly yours,

J. L. SHROUT, MANAGER  
SPACE MOTORS PROGRAM OFFICE

JUL 9 1965

TO: BSD (DFT)  
Attn: Colonel John W Hiney  
Norton AFB, California 92409

1. The Foreign Technology Division at Wright-Patterson AFB has received a report, of an alleged unidentified flying object, from the US Advisory Group in Thailand. The object which "fell from the sky" and was recovered by the Royal Thai Air Force, appears to be part of the igniting mechanism of a US Rocket.

2. We would appreciate your assistance in identifying the object in order that an adequate reply may be made to the US Advisory Group.

YOU - THE NUCLEUS OF SECURITY!

Ltr, Hq FTD (TDEW), 9 Jul 65, Unidentified Flying Object

1st Ind (BSFT/Maj Danhauer)

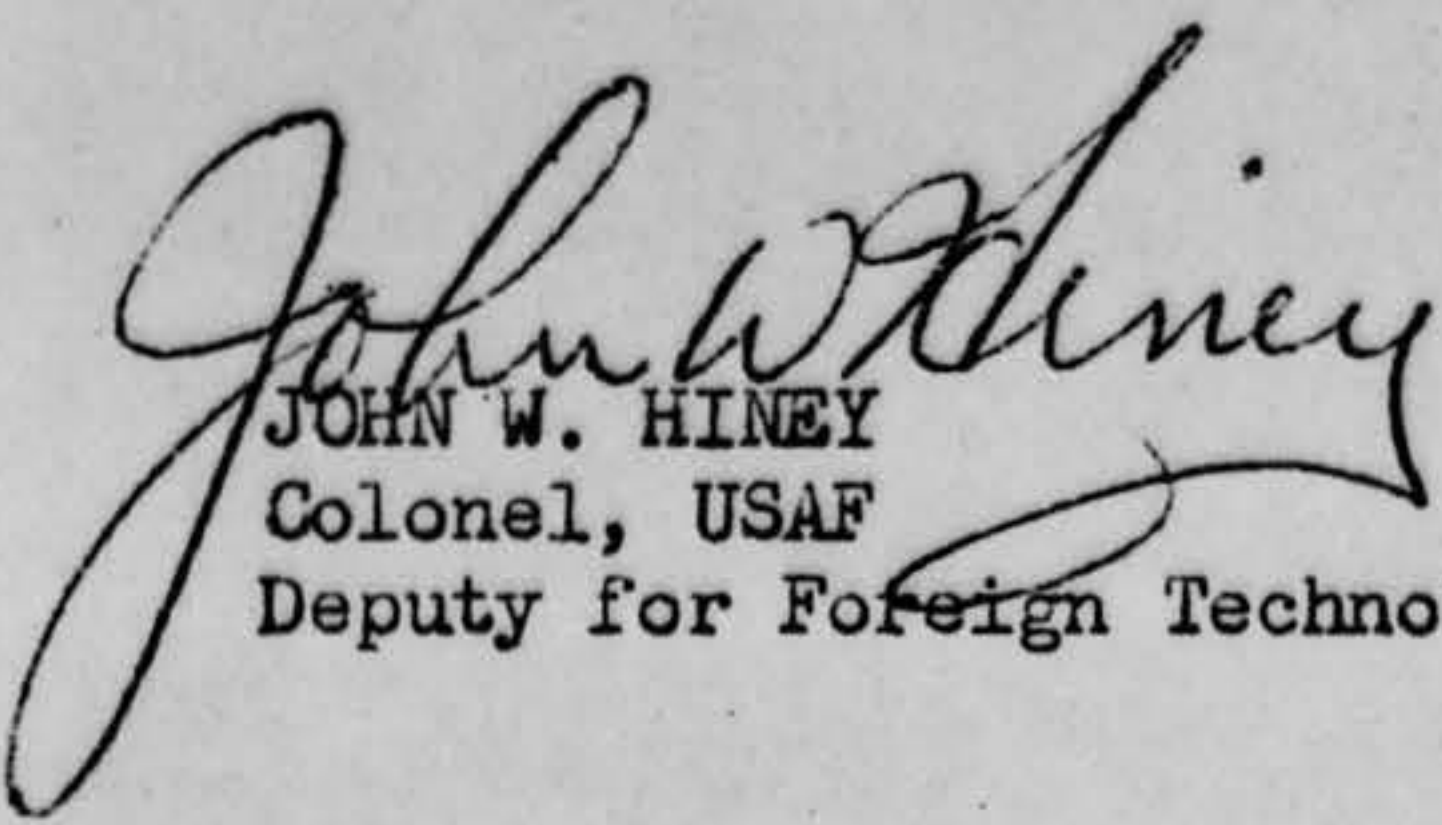

JUL 14 1965

Hq BSD, Norton AFB, California 92409

TO: Hq FTD (TDEW/Maj Quintanilla)  
Wright-Patterson AFB, Ohio 45433

The referenced object has been critically examined by personnel within BSD and cannot be positively identified. From markings observed on the individual parts, it is suspected that they are a product of the Allegheny Ballistic Laboratory. It is probably one of their X-254, 258, or 259 series solid motors utilized as the third stage on a Scout Rocket.
